Company profile

Psychiatrie Noord is the No. 1 mental health care provider in Groningen for international (exchange) students and expats. We provide specialized psychologic and psychiatric care for common mental health disorders within a multidisciplinary and dedicated team consisting of psychiatrists, (health care) psychologists, social psychiatric nurses, psychomotor therapists and systemic therapists.

We are a young and dynamic company with a hands on mentality that gives great value to its colleagues and actively stimulates the professional growth and development of its employees in order to develop themselves and Psychiatrie Noord.

Job description

As a psychologist, you play an important role in the diagnosis and treatment of (young)adults with common mental health disorders. You will work mainly with CBT, both in individual and group treatments. You evaluate those treatments and prepare the written reports. You participate and contribute to the multidisciplinary meetings, work consultations and supervisions/teaching sessions.

We stimulate your personal and professional development and offer the opportunity to follow relevant training and we even provide the opportunity to apply for the two year post master course to become a health care psychologist (GZ-psycholoog).
